Technical Skills

- **Scripting Languages;** HTML, CSS, JavaScript, NodeJS, PHP
- **Programming Languages;** React, C, C++, C#, Java,
- **Database Management;** MySQL, MongoDB
- **Web Development Stack;** MERN (MongoDB, Express, React, NodeJS)
- **UI/UX platforms;** Figma, Miro
- **Tools;** Redux, GitHub, Firebase, Visual Studio
- REST APIs
- Agile and TDD

Work Experience

Full stack Developer (Self-Employed)

2019 - Present

Working on contract jobs with individual clients and have been able to achieve 85%+ satisfaction rate on contracts, some of which I;

- Developed an e-commerce website using the MongoDB, Express, React, NodeJS stack, boosting customer sales by 80%
- Developed a blog website using React achieving a 90% client satisfaction rate
- Built a mobile banking app using JAVA increasing customer online satisfaction by at least 70%
- Integrated TDD (Test Driven Development) into 2 systems for higher performance

Relevant Projects:

- Developed an Online Student Attendance System using ReactJS, NodeJS, MongoDB
- Developed my portfolio website using ReactJS and CSS
- Built an ATM using C
- Created glassmorphic UI designs using Figma
- Improved the user experience of delivery systems using UI/UX research methods
- Analyzed Spotify using Tableau and WEKA

- Strategic Information Systems
- Business Intelligence
- UI/UX Design
- Individual Project

Aptech Limited, Nigeria

2018 to 2021

Advanced Diploma in Software Engineering

Notable Modules:

- Object Oriented Programming
- UI/UX Design
- Database Management (SQL server)
- Cloud Computing
- Agile for Software Projects

Additional Information

Languages – English

Right to Work – Yes, Student VISA, Soon applying for a Graduate VISA, Open to Sponsorships

I am a versatile software graduate with commitment to develop creative and innovative solutions. I have gained practical and theoretical skills in both my studies and my 3 years of commercial work experience including; software development, web development, programming, cloud computing, UI/UX design, and database management. I have a year experience in business analysis and project management. I am actively looking for a junior or graduate opportunity within an IT environment where I can utilize my academic and commercial skills to develop my IT career and experience.

Key Skills

Dedication: I always find myself ready to learn new things and giving my all to any project I'm working on.

Teamwork: I usually find myself always calm and relaxed therefore, I hardly ever panic and that allows my teammates the freedom to communicate efficiently with me.

Problem Solving: Detecting and fixing possible obstacles that will disrupt the flow of the project.
